Summary

Computer Science undergraduate specializing in Data Science with research and industry internship experience across **backend development, machine learning, and computer vision**. Experienced in developing **RESTful APIs, backend services, and end-to-end ML applications** using Node.js, Express.js, Python, Flask, FastAPI, and Streamlit. Skilled in **SQL, MySQL, data analysis, deep learning, and model development**, with research experience at IIT Tirupati and hands-on experience contributing to the ENX Money business finance platform.

Education

Chhattisgarh Swami Vivekanand Technical University, Bhilai B.Tech (Honors) in CSE (Data Science) CGPA: 7.8 / 10	<i>2023 – 2027</i> <i>Till 6th Semester</i>
Narayana Junior College Higher Secondary (Class XII) — Percentage: 89.6%	<i>2021 – 2023</i>
Narayana School Secondary (Class X) — Percentage: 99.5%	<i>2020 – 2021</i>

Experience

Backend Developer Intern – Enterprenex Solutions Pvt Ltd <i>IT Department (Remote/Online)</i>	Aug 2026 – Present <i>Waluj, Chhatrapati Sambhajnagar, Maharashtra</i>
- Contributing as a Backend Developer Intern to the development of ENX Money, a business finance and expense management platform integrating accounting, GST invoicing, inventory, and ledger management features. - Developing and integrating RESTful APIs for authentication, user and business profiles, customers, suppliers, khata ledger, products, inventory, sales invoices, purchase bills, payments, and financial transactions. - Working with Node.js, Express.js, MySQL, JWT, and Git/GitHub to implement backend services, database operations, API validation, authentication, and secure data handling. - Collaborating with frontend and data analytics teams to integrate APIs, support dashboard analytics, and ensure reliable data flow between the application, backend services, and database. - Following a structured Git branching and development workflow, including feature branches, code integration, testing, debugging, documentation, and deployment preparation for the application.	
Research Intern – Indian Institute of Technology Tirupati, SEVA Lab <i>Remote</i>	Jan 2026 – Jun 2026
- Worked under the supervision of Dr. Chalavadi Vishnu on computer vision and deep learning research for autonomous systems. - Contributed to an Edge-Semantic Collaborative Network for Camouflaged Object Detection (COD), focusing on deep learning-based feature learning and model development. - Applied computer vision techniques and deep learning frameworks to develop, optimize, and evaluate research-oriented model pipelines.	

Projects

NexCart – Full-Stack E-Commerce Web Application — React.js, MongoDB, Tailwind CSS	Live Demo
- Developed a full-stack e-commerce platform featuring product browsing, category-based filtering, real-time search, shopping cart, wishlist, user authentication, and responsive UI. - Designed and implemented scalable RESTful APIs using Node.js and Express.js with MongoDB for product, user, cart, and order management. - Integrated JWT-based authentication and connected the React.js frontend with backend services for secure and seamless data flow.	
EcoSort AI System — Python, Flask, React.js, PyTorch, SQLite, Tailwind CSS	Live Demo
- Developed a full-stack AI-powered waste classification system using MobileNetV2 transfer learning to classify recyclable waste images into multiple categories. - Built a Flask REST API backend for image upload, preprocessing, model inference, prediction results, and classification history. - Integrated the React.js frontend with backend APIs and SQLite for storing prediction data, analytics, and user interaction history.	

Image Search Engine — Python, Flask, Deep Learning, REST API

[Live Demo](#)

- Developed a deep learning-based image search engine that generates image embeddings and retrieves visually similar images based on query input.
- Designed a **Flask backend and REST API pipeline** for image processing, feature extraction, similarity-based retrieval, and search results.
- Deployed the application as a responsive web application, integrating the backend inference pipeline with the user-facing interface.

Skills

Programming Languages: Python, C/C++, SQL

Backend & Frameworks: Flask, FastAPI, REST APIs, Streamlit, Node.js, Express.js

DevOps & Deployment: Git, GitHub, GitHub Actions, CI/CD, Docker, Linux, Shell Commands, Server Deployment

Cloud & Hosting: AWS, IBM Cloud, Render, Netlify

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Machine Learning: Regression, Classification, Computer Vision, Generative AI

Tools: VS Code, Jupyter Notebook, Power BI, Microsoft Excel

Certifications

- Complete Python for Data Science and Machine Learning – **Krish Naik**
- AWS Training Certificate – **Amazon CodeWhisperer**
- Data Science Workshop – **Mindenious**
- Data Analysis using Excel – **Great Learning**
