

POLAMREDDY REVANTH REDDY

Data Science & Machine Learning Intern

✉ polamreddyrevanth.82@gmail.com | ☎ +91-9440829762 | 🌐 [Portfolio](#) | 🐙 [GitHub](#) | 🔗 [LinkedIn](#)

Summary

Computer Science undergraduate with dual research internship experience at IIT Tirupati and IIT Madras, contributing to autonomous vision systems and healthcare AI. Skilled in building and deploying machine learning models across classification, deep learning, and reinforcement learning domains. Seeking a Data Science or ML role to apply strong analytical foundations to real-world problems.

Work Experience

Research Intern – IIT Tirupati, SEVA Lab (Remote) Jan 2026 – Jun 2026

- Conducted research under Dr. Chalavadi Vishnu on Secure and Efficient Vision for Autonomous Systems, focusing on robust perception pipelines for real-world deployment.
- Designed and implemented deep learning models for computer vision tasks, optimizing for accuracy and inference efficiency on real-world datasets.

AI & Data Analytics Intern – Scholars' Minds, Tirupati (Offline) Feb 2026 – May 2026

- Applied ML and data analytics techniques on real-world datasets as part of a 3-month hands-on internship program.
- Worked on end-to-end data pipelines including preprocessing, model building, and result interpretation.

Research Intern – IIT Madras, Dept. of CSE May 2025 – Jul 2025

- Developed predictive models for healthcare applications using deep learning and data analytics, contributing to early-stage research on patient outcome forecasting.
- Improved model accuracy through systematic data preprocessing, hyperparameter tuning, and cross-validation using Python, TensorFlow, PyTorch, and Scikit-learn.

Projects

Sepsis Detection Using Machine Learning — *Python, Scikit-learn, Flask* [GitHub](#)

- Developed an ML model for early sepsis prediction using ICU patient datasets and clinical feature analysis.
- Applied SMOTE balancing and ROC-AUC evaluation to improve prediction reliability and handle class imbalance.

Student Performance Indicator — *Python, Flask, Machine Learning* [Live Demo](#)

- Built a complete end-to-end ML pipeline for predicting student academic performance.
- Developed and deployed a Flask-based web application for real-time prediction and interactive user input handling.

Crop Disease Advisory System — *Python, TensorFlow, GitHub.io* [Live Demo](#)

- Developed a CNN-based crop disease detection system that classifies plant diseases from leaf images and provides treatment recommendations.
- Deployed as an interactive web application enabling farmers to upload images and receive real-time disease diagnosis and advisory.

Flappy Bird RL Agent — *Python, DQN, Reinforcement Learning* [Live Demo](#)

- Designed and trained a Reinforcement Learning agent capable of playing Flappy Bird with nearly **90% decision accuracy**.
- Implemented DQN and Experience Replay techniques to improve gameplay learning efficiency and agent performance.

Skills

Languages: Python, SQL, R

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, PyTorch, Matplotlib, Seaborn, NLTK

ML & AI: Machine Learning, Deep Learning, Computer Vision, NLP, Reinforcement Learning

Frameworks & Tools: Flask, Streamlit, Git, Jupyter Notebook, VS Code, Power BI, Excel

Cloud: AWS, IBM Cloud, GitHub Actions

Education

Chhattisgarh Swami Vivekanand Technical University, Bhilai 2023 – 2027

B.Tech (Honours) in CSE (Data Science)

CGPA: 7.8 / 10 (Till 6th Semester)

Narayana Junior College 2021 – 2023

Higher Secondary (Class XII) — Percentage: 89.6%

Narayana School 2020 – 2021

Secondary (Class X) — Percentage: 99.5%

Certifications

- Complete Python for Data Science and Machine Learning – **Krish Naik**
- AWS Training Certificate – **Amazon CodeWhisperer**
- Data Science Workshop – **Mindenious**
- Data Analysis using Excel – **Great Learning**
